The Master's programs taught in English

"Convergence: Business management in the digital economy"

Students will develop skills of making economic decisions, understanding of new trends in the field of effective investments in this time of digital transformation. The training is based on methods of economic analysis, visualization of big data, case studies and working in groups.

"Convergence: Advanced technology"

The program trains engineers in the field of physical materials science. In the modern world, professionals must have a broad outlook and relevant competencies. Graduates will obtain interdisciplinary communication skills and will master high production technologies.

For more information, scan a QR code:

"Strategic Management"

The degree develops student's skills of making important decisions for development of organisations and for ensuring their competitiveness. Students focus on the international aspects of management, activities and operations and cross-cultural cooperation.

"Convergence: Cultural content in the digital age"

The goal of the program is to provide graduates who are prepared to work in the field of cultural industries, which is based on individual creativity that carries the potential to create value and jobs by producing and using intellectual property. The future masters should take into account cross-cultural differences in the process of communication.

"Linguistics"

The aim of the program is to train students, so that they will take key roles in the various linguistics-related activities at international standards. After finishing this educational program, students should be able to take a major role in professional ling and become acquainted with current trends in various fields of linguistics.

"Monitoring and Evaluation of the Quality of Language Education"

This program will give you the following advantages: possession of foreign domestic technologies and skills in designing activities of educational organizations, possession of systems for monitoring the quality of language education and developing individual learning paths.

Welcome to NEFU!
