### Abstract

 [View references \(24\)](#)

Bats are the only mammals capable of sustained flight and are notorious reservoir hosts for some of the world's most highly pathogenic viruses, including Nipah, Hendra, Ebola, and severe acute respiratory syndrome (SARS). To identify genetic changes associated with the development of bat-specific traits, we performed whole-genome sequencing and comparative analyses of two distantly related species, fruit bat *Pteropus alecto* and insectivorous bat *Myotis davidii*. We discovered an unexpected concentration of positively selected genes in the DNA damage checkpoint and nuclear factor κB pathways that may be related to the origin of flight, as well as expansion and contraction of important gene families. Comparison of bat genomes with other mammalian species has provided new insights into bat biology and evolution.

### How it works

1. Drag the "Save To Mendeley" button to your Bookmarks Bar

2. Find an article

Search for articles in a wide variety of sites, such as those listed below.

3. Click the "Save to Mendeley" bookmark

Click the "Save to Mendeley" bookmark you just created, and the article details will display on the right hand side of the page.

4. Review the details and Save

If the details look ok, click the "Save" button.

Next time you sync Mendeley Desktop, any newly saved articles will appear in the "Recently Added" section.

# Пример использования Web Importer

Click 'Save to Mendeley' to import references from your search results

The screenshot shows a web browser window with a Google Scholar search for 'Mendeley'. The search results are displayed on the left, and a Mendeley Web Importer overlay is shown on the right. The overlay displays 10 articles found and a 'Save all' button. The first article is 'Mendeley-A Last. fm For Research?' by Henning, V; Reichelt, J (2008). The second article is 'Generic assignments, strain histories and properties of pure cultures of cyanobacteria' by Rippka, R; Deruelles, J (1979). The third article is 'International Union of Pharmacology classification of receptors for 5-hydroxytryptamine (Serotonin)' by Hoyer, D; Clarke, DE; Fozard, JR (1994). The fourth article is 'The membrane actions of anesthetics and tranquilizers' by Seeman, P (1972).

Web Importer overlay:

**Cooperativity in protein folding: from lattice models with sidechains to real proteins.**

Authors: D. Klimov, D. Thirumalai

 View research catalog entry for this paper

Journal: *Folding & design*

Year: 1998

Volume: 3

Issue: 2

Pages: 127-39

**Abstract:**

Over the past few years novel folding mechanisms of globular proteins have been proposed using minimal lattice and off-lattice models. The factors determining the cooperativity of folding in these models and especially their explicit relation to experiments have not been fully established, however.

## Why Full Open Access Matters

Michael W. Carroll<sup>\*</sup>  
American University, Washington, D.C., United States of America

Scientific authors who pay to publish their articles in an open-access publication should be congratulated for doing so. They also should be aware that they may not be getting full open access from some publications that charge for publication under the "open access" label. Two features define an open-access publication: (1) the published contents are freely accessible through the Internet, and (2) readers are given copyright permission (see Box 1) to republish or reuse the content as they like so long as the author and publisher receive proper attribution [1]. Recently, some publications have begun offering an open-access option that charges for Internet publication without granting readers full reuse rights, such as Springer's Open Choice or Nature's Scientific Reports. These publishers have adopted a business model through which authors pay for immediate publication on the Internet but the publisher nonetheless keeps commercial reuse rights for itself. This is not full open access (see Box 2).

Getting open access right matters because the new publishing model is designed to increase the pace and impact of scientific communication through the power of the Internet. Immediate, free publication increases the audience for scientific research and overcomes the increasingly high price barrier to access imposed by the traditional.

is to shift from a model that uses copyright to control reuse of content to one that uses copyright to encourage republication, preservation, and translation.

### Why Support the Open-Access Financial Model?

Pricing of traditional, subscription-financed scientific journals is highly inefficient. The growth in digital technologies and in digital networks should be driving down the price of access to the scholarly journal literature, but instead prices have increased at a rate greatly in excess of inflation (e.g., [4,5]). Moreover, studies from journal publishing in some disciplines show that commercial journal publishers successfully charge significantly more than non-commercial journal publishers, such as scholarly societies, even when the commercial offerings make less valuable contributions to the progress of science and knowledge as measured by citations (e.g., [6]).

The economic roots of the pricing problem are not difficult to discern. Journal publishers provide a platform between authors of journal articles and their readers. In these situations, the go-between can choose a mix of prices to each side of the relationship, usually charging more to the party that is more dependent on the go-between. The tradi-

their demand is relatively inelastic for two reasons. First, libraries are mission-driven to acquire as broad a swath of the literature as they can afford to serve their patrons effectively. Second, subscriptions for academic journals within a given field are not readily interchangeable, unlike, say, subscriptions to news magazines, because each academic journal publishes unique research. Having their subscribers over a barrel, commercial publishers have steadily consolidated to reduce their costs while increasing profits through uncompetitive pricing [7].

The open-access model fundamentally shifts the balance of power in journal publishing, and thereby greatly enhances the efficiency and efficacy of scientific communication. In its most common form, the model shifts the costs of publication entirely to the author-funder side of the relationship so as to broaden access as far as the Internet reaches and to remove the need for any lingering usage barriers. By shifting the costs of publication entirely to the author-funder side, journals must compete head-to-head on quality and price without diminishing impact through price or usage barriers because authors have greater choice over where to publish than libraries have over whether to subscribe. This increased competition will reduce the overall costs

**Open Access Publishing: What Authors Want**

Authors: R. Nariani, L. Fernandez

View research catalog entry for this paper

Journal: *College & Research Libraries*

Year: 2012

Volume: 73

Issue:

Pages: 182-195

**Abstract:**

Campus-based open access author funds are being considered by many academic libraries as a way to support authors publishing in open access journals. Article processing fees for open access have been introduced recently by publishers and have not yet been widely accepted by authors. Few studies have surveyed authors on their reasons for publishing open access and their perceptions of open access journals. The present study was designed to gauge the uptake of library support for author funding and author satisfaction with open access publishing. Results indicate that York University authors are increasingly publishing in open access journals and are appreciative of library funding initiatives. The wider implications of open access are discussed along with specific recommendations for publishers.

"An open-access fund is a pool of money set aside by an institution to support publication models that equitable support for the business model for open access journals. This would place the subscription and article processing-fee

# Комментарии и выделение

The screenshot displays the Mendeley Desktop application window. The title bar reads "Mendeley Desktop". The menu bar includes "Pan", "Highlight", "Note", "Select", "Copy", "Paste", "Rotate", "Zoom", "Fullscreen", and "Sync". The main content area shows a document titled "Open Access Publishing Authors Want" by Rajiv Nariani and Leila Fernandez. A yellow sticky note is overlaid on the document, containing the text: "You 12/03/2014 16:08 This sticky note allows you to annotate your paper. You can also make notes to the right." The right sidebar has tabs for "Details", "Notes", "Contents", and "Enrichments". The "Notes" tab is active, showing a "Notes:" section with a text area and a "Annotations:" section with a text area. The text in the "Annotations:" section reads: "This paper has no annotations yet. You can add notes and highlights in the PDF viewer." A large grey arrow points from the top left towards the sticky note, and another large grey arrow points from the sticky note towards the "Notes" panel.

# Просмотр значения терминов

The screenshot shows the Mendeley Desktop application interface. The main window displays a document titled "Open Access Publishing: What Authors Want" by Rajiv Nariani and L. Fernandez. A tooltip is visible over the text "Open access", providing a definition: "Open access (OA) means unrestricted online access to peer-reviewed scholarly research. Open access is primarily intended for scholarly journal articles, but is also provided for a growing number of theses, book chapters, and scholarly monographs. Open access comes in two degrees: *gratis* OA, which is free online access and *libre* OA, which is free online access." The details sidebar on the right shows the article type as "Journal Article", the journal as "College & Research Libraries", the year as 2012, volume as 73, and pages as 182-195. The abstract text is also visible in the sidebar.

# Поиск CSL Style

База данных Mendeley содержит более 6700 стилей

# Редактор стилей

The screenshot shows a web browser window with the URL `editor.citationstyles.org/about/`. The page has a navigation bar with links for "About", "Search by name", "Search by example", "Visual editor", and "Code editor". A "feedback" button is located in the top right corner. The main heading is "Find and edit CSL citation styles". Below it is a search input field with the placeholder text "Search...". A note below the search field states: "Note: This set of tools is still in public beta. Please report any bugs or feedback using the form at the top right of the screen."

## 1. Find a style

### Search by name

If you're looking for a style like APA, Harvard, etc... just use the search box at the top of the page to search for a style name, or journal title.

### Search by example

If you don't know the name of the style, but know what the final citation should look like, you can use our [search by example](#) tool to find styles that most closely match.

The example shows two citation styles. The first is "INLINE CITATION" with the example "(McInnis & Nelson, 2011)". The second is "BIBLIOGRAPHY" with the example "McInnis, M. D., & Nelson, L. P. (2011). *Shaping the Body Pol Formation in Early America*. University of Virginia Press."

## 2. Edit the style

If you can't find a style that quite suits your needs, find one that's a pretty close match and click the "Edit style" button to open that style in the [visual editor](#).

The example shows a search result for "American Journal of Medical Genetics". It displays the "INLINE CITATION" "[McInnis and Nelson, 2011]" and the "BIBLIOGRAPHY" "McInnis, MD, Nelson, LP. 2011. *Shaping the Body Formation in Early America*. University of Virginia Press". Below the citation are three buttons: "Install", "Edit", and "View code". A mouse cursor is pointing at the "Edit" button.

## 3. Use the style

Once you've found a style that's suitable for you to use, simply click the "Install" button on the search results, or "Save" a style you've edited, to use it in your reference manager.

The screenshot displays the Visual CSL Editor interface in a browser window. The address bar shows the URL `editor.citationstyles.org/visualEditor/`. The navigation menu includes 'About', 'Search by name', 'Search by example', 'Visual editor' (selected), and 'Code editor'. A 'feedback' button is visible in the top right.

The main content area is titled 'American Psychological Association 6th edition'. On the left, a sidebar lists various configuration options under categories: 'STYLE INFO' (Info, Global Formatting Options), 'INLINE CITATIONS' (Layout, Sort), 'BIBLIOGRAPHY' (Layout, Sort), 'MACROS' (Macro: container-contributors, Macro: secondary-contributors, Macro: author, Macro: author-short, Macro: access, Macro: title, Macro: publisher, Macro: event, Macro: issued, Macro: issued-sort, Macro: issued-year, Macro: edition, Macro: locators, Macro: citation-locator, Macro: container, Macro: container-title), and 'ADVANCED' (Global Formatting Options).

The main panel shows 'EXAMPLE CITATIONS' and 'EXAMPLE BIBLIOGRAPHY'. Below these is an 'Info' section with the following fields:

- Title: American Psychological Association 6th edition
- Title (short): APA
- ID: <http://www.zotero.org/styles/apa>
- Summary: (empty)
- Rights: This work is licensed under a Creative Commons Attribution-ShareAlike 3.0 license
- Published: (empty)
- ISSN: (empty)
- eISSN: (empty)

At the bottom of the 'Info' section, there is an 'ISSNs' label and an 'Add ISSN' button.

### Discipline summary

Biology is the study of life. It attempts to understand the structure, function, processes and evolution of living organisms and how they relate to their environment. Modern biology covers a wide variety of fields and is highly interdisciplinary, drawing on advances in areas such as computer science, mathematics, psychology. Because biology is such a broad subject, it is subdivided according the ...

# Частные группы

The screenshot shows the Mendeley Desktop application interface. At the top, there are window controls and a search bar. Below that, a navigation bar includes 'Documents', 'Folders', 'Related', and 'Sync'. The main content area is titled 'Mendeley for Librarians, owned by William Gunn' and has an 'Edit Settings' button. The interface is divided into three tabs: 'Overview', 'Documents', and 'Members'. The 'Overview' tab is active, showing a text input field for asking questions or comments. Below this, there are three posts:

- You**: A post with a quote: "How US libraries are becoming community problem solvers – From Obamacare to getting kids reading, libraries have a bigger part to play in local communities than ever before". It includes a link to a Guardian article and is dated 3rd April.
- Esther Fernandez Ramos**: A post saying "Hello and thanks! I'm a librarian at Universitat de les Illes Balears, Spain." dated 2nd April.
- Sandrine Royer-Devaux**: A post saying "Hello everyone. I'm a librarian at Institut Pasteur in Paris, France. I'm working with researchers in biomedical sciences. You can visit our website" with a link to a website, dated 28th March.

On the left side, there is a 'GROUPS' list with 'Mendeley for Librarians' selected. Below the groups list is a 'Filter by Authors' dropdown menu showing a list of names: 'All', 'Allen, David', 'Anderson, Lisa', and 'Antonescu, Mary'.

The screenshot shows the Mendeley Desktop application window. The main pane displays a document titled "A game for smokers: A preliminary naturalistic trial in a psychiatric hospital" by Yasser Khazaal, Anne Chatton, Roberto Prezzemolo, Aliosca Hoch, Jacques Cornuz, and Daniele Zullino. The document includes an abstract, introduction, and keywords. The sidebar on the right shows a list of notes, with two highlighted in yellow. The first note is dated 05/04/11 5:50 PM and contains the text "interesting separating parts of the abstract...". The second note is dated 06/04/11 5:46 PM and contains the text "feasibility of game toward behavior change...". The application window also shows a menu bar with options like Pan, Highlight, Note, Select, Copy, Paste, Rotate, Zoom, Fullscreen, and Sync.

Short communication

## A game for smokers: A preliminary naturalistic trial in a psychiatric hospital

Yasser Khazaal<sup>a,\*</sup>, Anne Chatton<sup>a</sup>, Roberto Prezzemolo<sup>a</sup>, Aliosca Hoch<sup>a</sup>, Jacques Cornuz<sup>b</sup>, Daniele Zullino<sup>a</sup>

<sup>a</sup>Division of Substance Abuse, University Hospitals of Geneva, Switzerland  
<sup>b</sup>Department of Ambulatory Care and Community Medicine, University Hospital, Lausanne, Switzerland

Received 5 June 2007; received in revised form 4 October 2007; accepted 8 October 2007

### Abstract

**Objective:** "Pick-Klop" is a game based on cognitive behavioral therapy. It aims to change smokers' attitudes towards tobacco addiction. This study tests the feasibility and the impact of one brief session of the intervention in a naturalistic setting within a psychiatric hospital.

**Method:** Fifty-one smokers were recruited during their stay in a psychiatric hospital with a prohibitive smoking policy. They were assessed pre- and post-treatment with visual analogue scales designed to evaluate their intention to stop smoking.

**Results:** All patients completed the intervention. The outcome shows that the intention to stop smoking becomes significantly stronger after the intervention.

**Conclusion:** This pilot study supports the feasibility and the effectiveness of the "Pick-Klop" game in a psychiatric hospital setting. The game seems to improve the intention to quit smoking. The data, however, should be confirmed by a controlled trial. Moreover, follow-up studies are needed to examine the potential impact of the game on smoking cessation attempts.

**Practical implications:** The game seems to be a useful and simple tool for education about smoking in a psychiatric hospital setting.

**Keywords:** Smoking; Smoking cessation; Cognitive behavior therapy; Motivational interviewing; Psychiatric hospital; Prohibitive smoking policy

### 1. Introduction

Smoking is the first avoidable cause of morbidity and mortality [1]. Most smoking cessation attempts are made without any help [2].

Despite the efficacy of nicotine substitutes [3], bupropion [4] and some behavioral approaches [5], these treatments are used only by a minority of smokers [6,7]. This is probably due to the

sufficient to induce behavioral changes [9]. Positive attitudes towards giving up nicotine addiction, however, are linked to a greater willingness to stop smoking [10].

In the transtheoretical model of behavioral change, a re-evaluation of the advantages and disadvantages of nicotine addiction and cessation enable smokers to evolve within the motivational process [11].

The notion of "self-efficacy" [12] corresponds to the trust
