

Видимость и цитирование научной статьи: возможности влияния

Андрей Локтев,
консультант по ключевым информационным решениям Elsevier

13/11/2017

Содержание

- Роль научных источников в статье
- Выбор журнала
- Продвижение статьи

Роль научных источников в статье

Чтение научной литературы способствует созданию нового знания

Правильное цитирование

Значение цитирования:

Помещает вашу работу в контекст, создает диалог

Отдает должное предыдущим работам, которые легли в основу вашего исследования

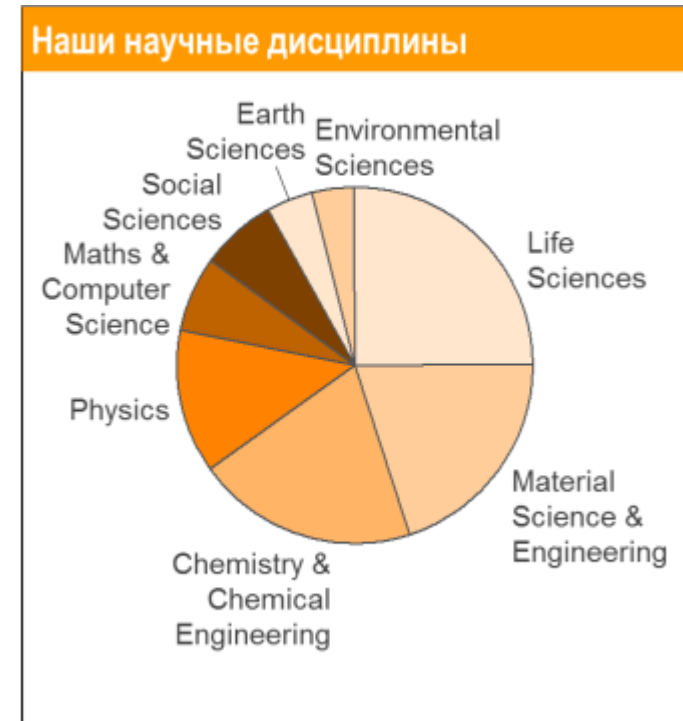

Сохраняет достоверность и точность научной литературы

Библиография в вашей научной статье

- Цитируйте основные научные публикации, на которых основана ваша работа
- Не увлекайтесь ссылками
- Будьте уверены, что вы полностью освоили материал, на который ссылаетесь. Не полагайтесь только на выдержки или отдельные предложения
- Избегайте излишнего самоцитирования
- Не увлекайтесь цитатами публикаций из одного региона
- Строго придерживайтесь формата, рекомендуемого Руководством для авторов

Журналы Elsevier - акцент на востребованности и качестве

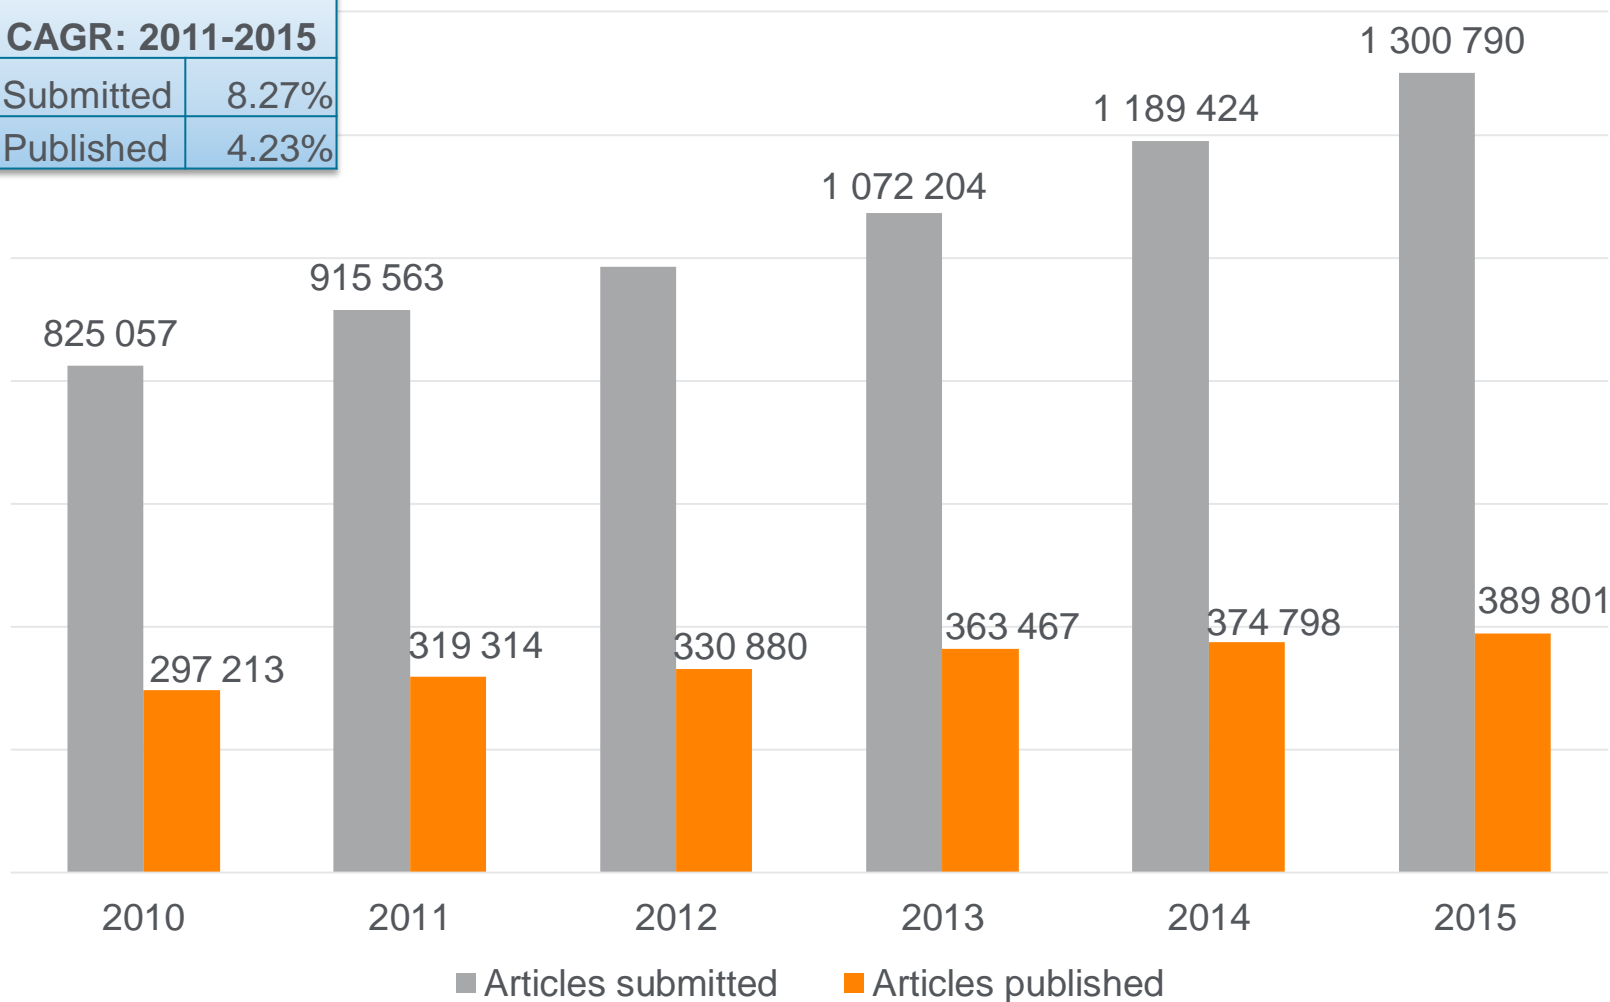

- Более **20** скачиваний в секунду
- Более **15 млн** пользователей по всему миру
- **>23%** всех опубликованных в мире научных статей*
- **21%** среди **1%** наиболее цитируемых статей в мире*
- **61 журнал Elsevier** занимает первое место в своей научной категории по импакт-фактору

Elsevier последовательно работает над повышением качества журналов

Заявки и опубликованные статьи

5 Year CAGR: 2011-2015	
Articles Submitted	8.27%
Articles Published	4.23%

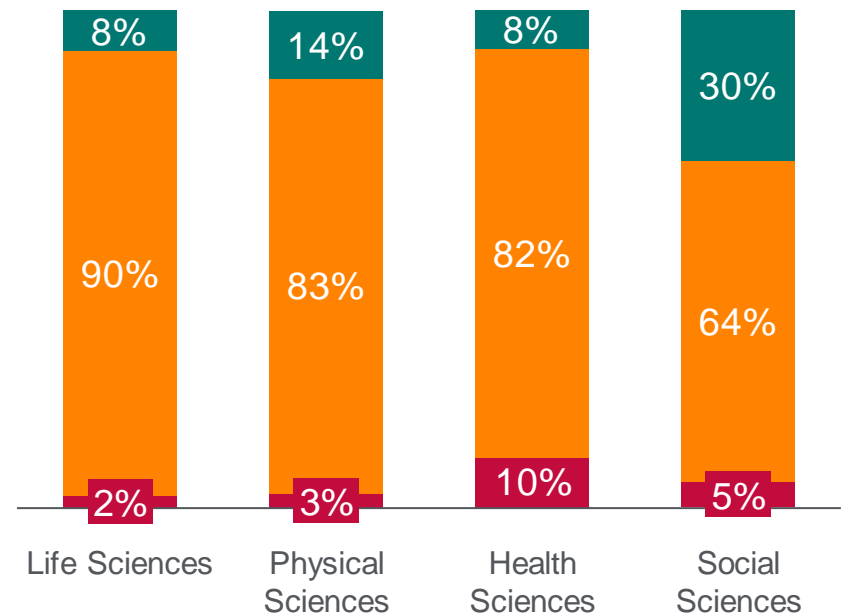

*Figures for all Elsevier Journals

Elsevier поддерживает высокий уровень качества всех журналов независимо от дисциплины

Мировой уровень

ScienceDirect FreedomCollection 2016

Распределение стате по качеству по научным направлениям (FWCI за 2014 год)

- High (FWCI > 2)
- Mid (0.5 < FWCI < 2)
- Low (FWCI < 0.5)

endothelial activation markers during bezafibrate treatment, suggesting that bezafibrate may reduce endothelial activation [27].

In conclusion, our studies show that the decrease of D-dimer levels upon treatment with ... in the first hours and is sustained. In addition, upon treatment ... levels and thrombin peak height decrease. This suggests that, ... described effect on endothelial activation, there may also be ... ration. The possible prognostic value of elevated D-dimer levels ... patients with a history of thrombosis is promising but requires further

investigation.

The following is the supplementary data related to this article.

Supplementary Fig. 1.

PNH granulocyte clone size correlates to the degree of hemolysis.

Выбор журнала

Выбор журнала

Изучите возможных «кандидатов» чтобы выяснить :

- Тематику и целевую аудиторию журнала
- Принимаемый тип статей
- Читаемость и рейтинг
- Текущие «горячие» темы
 - просмотрите рефераты последнего выпуска
- Проведите поиск по базам данных научной информации ScienceDirect, Scopus.
- Ознакомьтесь с руководством для автора (Guide for Authors)

Выбор способа доступа к журналу

- По подписке – публикация бесплатна
- Open Access – публикация платная
- Hybrid journal – публикация бесплатна, но за плату можно перевести статью в открытый доступ

How to publish in an Elsevier journal

Every year, we accept and publish more than 250,000 journal articles. Publishing in an Elsevier journal starts with finding the right journal for your paper. If you already know which journal, you can enter the title directly in the search box below. Alternatively, click on the 'Start matching' button to find a suitable journal based on the abstract of your article.

SCImago Journal Rank (SJR): **0.672** 

The journal accepts papers about experiments (both plasma and technology), theory, models, methods, and designs in areas relating to technology, engineering, and applied science aspects of **magnetic and inertial fusion energy**. Specific areas of interest include: MFE and IFE **design studies** for experiments and reactors; **fusion nuclear technologies and materials**, including blankets and shields; analysis of **reactor plasmas**; plasma heating, fuelling, and vacuum systems; drivers, targets, and special technologies for IFE, controls and diagnostics; **fuel cycle analysis and tritium reprocessing** and handling; operations and remote maintenance of reactors; safety, **decommissioning**, and **waste management**; economic and environmental analysis of components and systems.

Benefits to authors

We also provide many author benefits, such as free PDFs, a liberal copyright policy, special discounts on Elsevier publications and much

Распределение журналов по издательствам в Scopus

Независимая экспертная оценка содержимого Scopus

- Издания отбираются независимым Content Selection & Advisory Board (CSAB)
- В основе CSAB – экспертиза в отдельной предметной области; многие члены Совета – бывшие редакторы

Фокус на качество через отбор содержания независимым CSAB для:

- Обеспечения точных и релевантных результатов поиска для пользователей
- Отсутствия некачественных данных
- Поддержка статуса авторитетной базы данных, «отражающей верные данные» и доверия пользователей

Задача подбора журнала начинается с формулирования поискового запроса

Cuckoos in raptors' clothing: barred plumage illuminates a fundamental principle of Batesian mimicry

Thanh-Lan Gluckman, Nicholas I. Mundy

DOI: 10.1016/j.anbehav.2013.09.020

Get rights and content

Highlights

- We quantified barred plumage in Old World parasitic cuckoos and sympatric raptors.
- We test whether distribution overlap predicts similarity in barred plumage.
- Cuckoos match sympatric raptors and similarity is rarely influenced by habitat.
- There is no match for any aspect of patterning in cuckoos and allopatric raptors.
- This conforms to Batesian mimicry and cuckoo–hawk mimicry may be widespread.

A fundamental principle of Batesian mimicry is that it pays to look like a local harmful species that is recognizable to other local species (receivers). Mimicking an allopatric species confers no benefit, as it is

Total Energy Control Law

The diagram illustrates a control system for a hybrid energy system. It starts with two input voltage signals, v_{SCREF} and v_{FC} , which are processed through 'Voltage-to-Energy Transformation' blocks. The v_{SCREF} path includes a transfer function $\frac{1}{2} C_{SC} v_{SCREF}^2$ and a summing junction. The v_{FC} path includes a transfer function $\frac{1}{2} C_{FC} v_{FC}^2$ and another summing junction. The outputs of these blocks are summed to produce v_{TR} . This signal is then fed into a 'Total Energy Control Law' block, which contains an integrator $\frac{1}{s}$ and a gain K_{21} . The output of this block is summed with a reference power P_{Load} to produce a total power signal. This signal is then processed by an 'MPP' (Maximum Power Point) block, which outputs P_{SolMin} and P_{SolMax} . The power signal is then fed into a 'Solar Cell Power Dynamic Limitation' block, which contains a transfer function $\frac{1}{(s/a_{s2})^2 + 2\zeta_{s2}s + 1}$. The output of this block is summed with a reference power P_{SolREF} to produce a signal that is then processed by a 'Fuel Cell Power Dynamic Limitation' block, which contains a transfer function $\frac{1}{(s/a_{fc1})^2 + 2\zeta_{fc1}s + 1}$. The output of this block is summed with a reference power P_{FCREF} to produce a signal that is then processed by a 'Fuel Cell Power Dynamic Limitation' block, which contains a transfer function $\frac{1}{(s/a_{fc1})^2 + 2\zeta_{fc1}s + 1}$. The output of this block is summed with a reference power P_{FCREF} to produce a signal that is then processed by a 'Fuel Cell Power Dynamic Limitation' block, which contains a transfer function $\frac{1}{(s/a_{fc1})^2 + 2\zeta_{fc1}s + 1}$. The output of this block is summed with a reference power P_{FCREF} to produce a signal that is then processed by a 'Fuel Cell Power Dynamic Limitation' block, which contains a transfer function $\frac{1}{(s/a_{fc1})^2 + 2\zeta_{fc1}s + 1}$.

Abstract
 We have measured inclusive data on K^+ -meson production in pp collisions at COSY Jülich close to the hyperon production threshold and determined the hyperon-nucleon invariant mass spectra. The spectra were decomposed into three parts: Λp , $\Sigma^0 p$ and $\Sigma^+ n$. The cross section for the $\Sigma^+ n$ channel was found to be much smaller than a previous measurement in that excess energy region. The data together with previous results at higher energies are compatible with a phase space dependence.

Keywords
 Meson production; Hyperon-nucleon interaction

Вам следует убедиться в том, что ваше исследование получает то внимание, которое оно заслуживает

- Количество научных статей растет ускоренными темпами
- Для большинства ученых, это сложно оставаться в курсе и следить за всеми публикуемыми статьями
- Ваша задача: сделать все для того, чтобы ваше исследование не затерялось в общем потоке!

7 час./неделя

Share Link

How it works

Authors receive a customized Share Link to their newly-published article on ScienceDirect. The link provides 50 days' free access to their article – after that, the usual access rules apply.

Users clicking on the Share Link within the 50-day period will be taken directly to the article with no sign up or registration required. Share Links are ideal for sharing via email and social networks such as [Facebook](#) ↗ , [Twitter](#) ↗ , [LinkedIn](#) ↗ , and [ResearchGate](#) ↗ .
