

Возможности Mendeley для подготовки статьи и взаимодействия с коллегами во всем мире

05.04.2017

Что такое система управления библиографией?

Система управления библиографией (Reference management software) - это система, позволяющие исследователям, учёным и писателям создавать, организовывать в персональной библиотеке и повторно использовать библиографические ссылки

zotero

Abstract

It is demonstrated that in the framework of the perturbation theory on laser field strength and the Fermi equivalent photon method expressions for photon transition, probabilities can be obtained that permit the derivation of scaling laws in terms of atomic state quantum numbers and pulse duration. A unified approach is developed that identifies universal scaling parameters for energy and pulse duration that allow analytical investigation of the interrelation of scaling laws for the two important regimes of above and below-threshold ionization. Numerical studies are presented that illuminate the conditions for linear and nonlinear regimes of photoionization, as dependent on the cycle number and carrier frequencies. We also discuss analytical asymptotic forms of the different regimes of photoionization. Finally, we develop a generalized unified approach that permits studies in terms of principal and orbital quantum numbers as well as in pulse duration for any regime of carrier frequencies. © 2016 IOP Publishing Ltd.

Как устроен Mendeley?

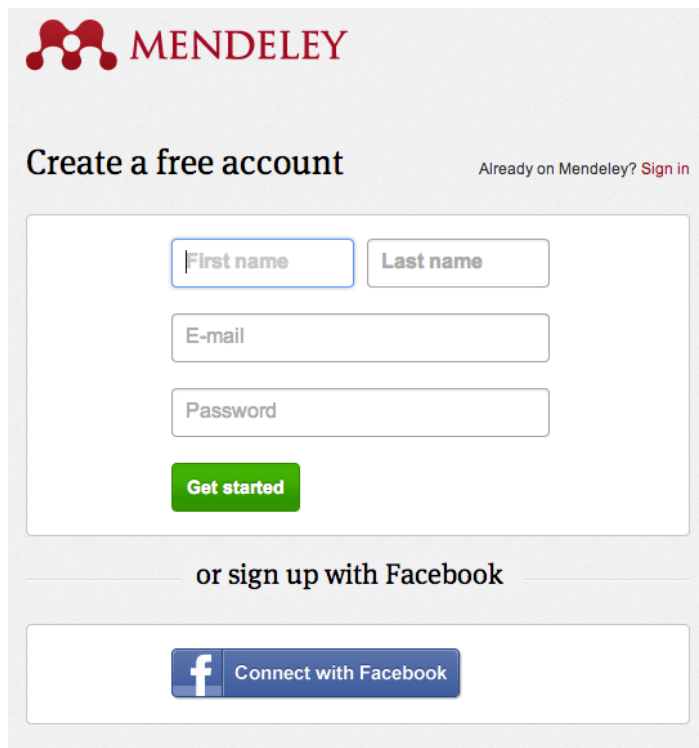

Менеджер ссылок

Ваша библиотека в Mendeley

Шаг 1:
Зарегистрироваться на
www.mendeley.com, лучше с
университетской почты

The screenshot shows the Mendeley registration interface. At the top left is the Mendeley logo (three red circles) and the word "MENDELEY" in red. Below it, the text "Create a free account" is displayed, with a link "Already on Mendeley? Sign in" to the right. The registration form contains four input fields: "First name", "Last name", "E-mail", and "Password". A green "Get started" button is positioned below the "Password" field. Below the form, the text "or sign up with Facebook" is shown, followed by a blue button with the Facebook logo and the text "Connect with Facebook".

Шаг 2:
Скачать **Mendeley Desktop**
Mendeley Desktop for Mac OS X

Version 1.11 for Mac OS X 10.6+

Your download should start automatically in a few seconds.

If it doesn't, [restart the download](#).

[Need a different version?](#)

Шаг 3:
Организовать свою библиотеку

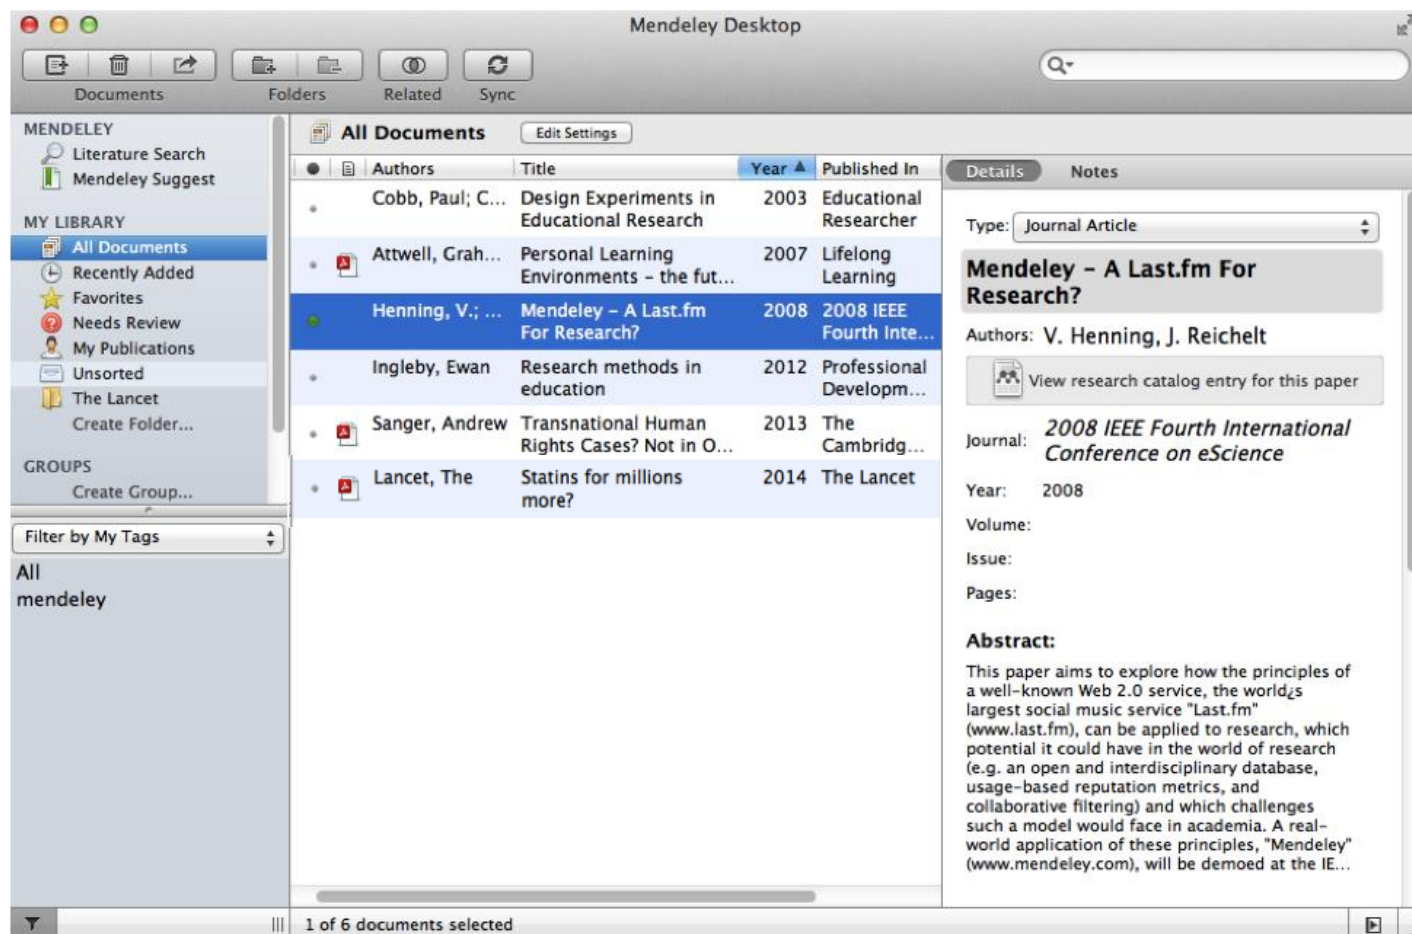

Mendeley Desktop

The screenshot shows the Mendeley Desktop application window. The title bar reads "Mendeley Desktop". The interface is divided into several sections:

- Top Bar:** Contains icons for Documents, Folders, Related, and Sync, along with a search bar.
- Left Panel:**
 - MENDELEY:** Includes "Literature Search" and "Mendeley Suggest".
 - MY LIBRARY:** Lists "All Documents" (selected), "Recently Added", "Favorites", "Needs Review", "My Publications", "Unsorted", and "The Lancet".
 - GROUPS:** Includes "Create Group...".
 - Filter by My Tags:** A dropdown menu currently showing "All mendeley".
- Main Document List:** A table with columns: Authors, Title, Year, and Published In.

Mendeley Web Importer

Mendeley Research Catalog

Web Importer

сохранение данных в процессе работы с веб-страницами

How it works

1. Drag the "Save To Mendeley" button to your Bookmarks Bar

Can't see your Bookmarks Bar?

2. Find an article

Search for articles in a wide variety of sites, such as those listed below.

3. Click the "Save to Mendeley" bookmark

Click the **"Save to Mendeley"** bookmark you just created, and the article details will display on the right hand side of the page.

4. Review the details and Save

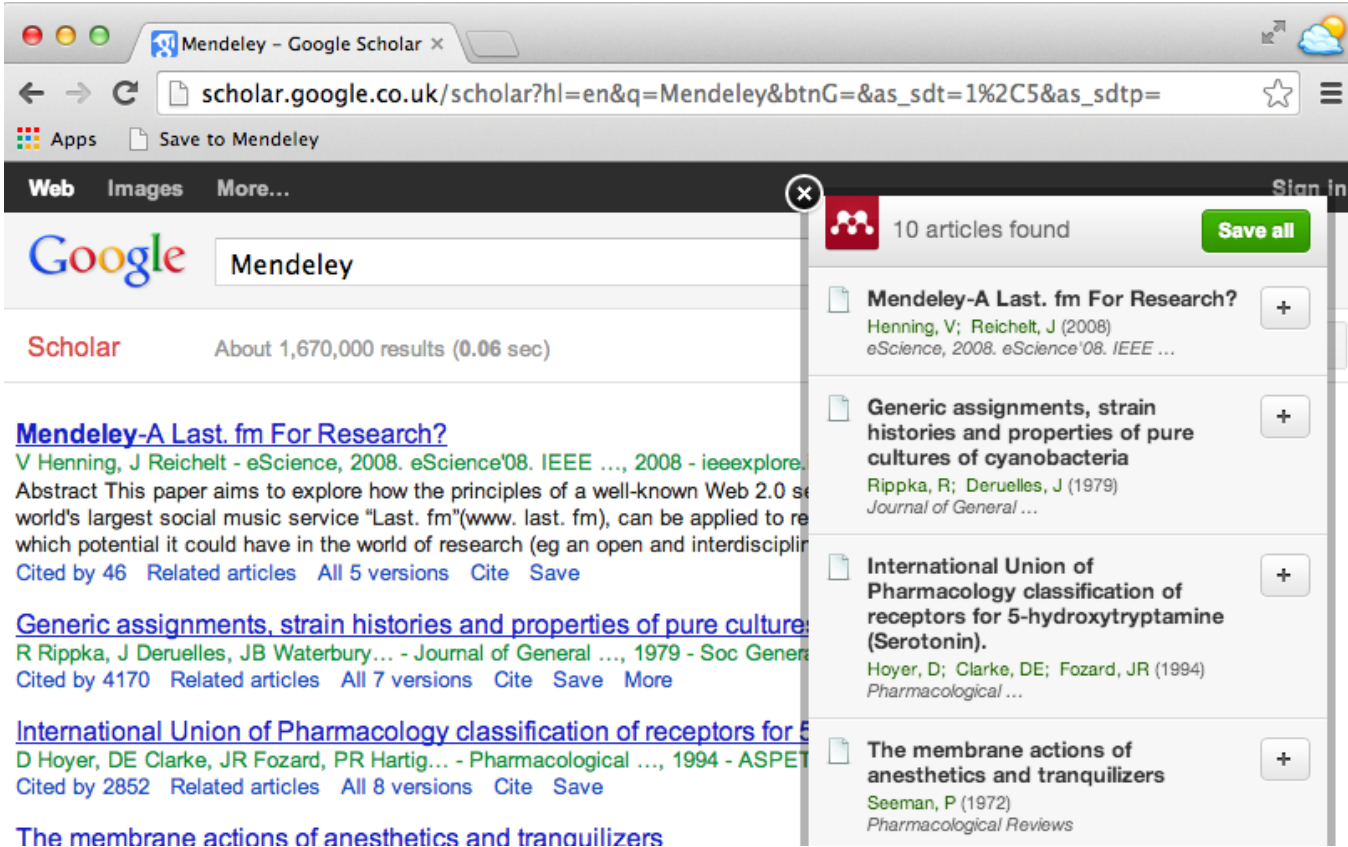

If the details look ok, click the "Save" button.

Next time you sync Mendeley Desktop, any newly saved articles will appear in the "Recently Added" section.

Пример использования Web Importer

Click 'Save to Mendeley' to import references from your search results

The screenshot shows a web browser window with a Google Scholar search for 'Mendeley'. The search results are displayed on the left, and a Web Importer overlay is shown on the right. The overlay displays 10 articles found and a 'Save all' button. The first article is 'Mendeley-A Last. fm For Research?' by Henning, V; Reichelt, J (2008). The second article is 'Generic assignments, strain histories and properties of pure cultures of cyanobacteria' by Rippka, R; Deruelles, J (1979). The third article is 'International Union of Pharmacology classification of receptors for 5-hydroxytryptamine (Serotonin)' by Hoyer, D; Clarke, DE; Fozard, JR (1994). The fourth article is 'The membrane actions of anesthetics and tranquilizers' by Seeman, P (1972). A grey arrow points to the 'Save to Mendeley' button in the browser's address bar. Another grey arrow points to the 'Save all' button in the Web Importer overlay.

Select an article and import the reference to your library in one click.

Authors: N. Konobeeva, M. Belonenko

View research catalog entry for this paper

Journal: *Physica B: Condensed Matter*

Year: 2014

Volume: 438

Issue:

Pages: 45-47

Abstract:

The paper addresses the propagation of ultra-short optical pulses in chiral carbon nanotubes in the presence of external alternating electric field. Following the assumption that the considered optical pulses are represented in the form of discrete solitons, we analyze the wave equation for the electromagnetic field and consider the dynamics of pulses in external field, their initial amplitudes and frequencies.

Cooperativity in protein folding: from lattice models with sidechains to real proteins.

Authors: D. Klimov, D. Thirumalai

 View research catalog entry for this paper

Journal: *Folding & design*

Year: 1998

Volume: 3

Issue: 2

Pages: 127-39

Abstract:

Over the past few years novel folding mechanisms of globular proteins have been proposed using minimal lattice and off-lattice models. The factors determining the cooperativity of folding in these models and especially their explicit relation to experiments have not been fully established, however.

Scientific authors who pay to publish their articles in an open-access publication should be congratulated for doing so. They also should be aware that they may not be getting full open access from some publications that charge for publication under the "open access" label. Two features define an open-access publication: (1) the published contents are freely accessible through the Internet, and (2) readers are given copyright permission (see Box 1) to republish or reuse the content as they like so long as the author and publisher receive proper attribution [1]. Recently, some publications have begun offering an open-access option that charges for Internet publication without granting readers full reuse rights, such as Springer's Open Choice or Nature's Scientific Reports. These publishers have adopted a business model through which authors pay for immediate publication on the Internet but the publisher nonetheless keeps commercial reuse rights for itself. This is not full open access (see Box 2).

Getting open access right matters because the new publishing model is designed to increase the pace and impact of scientific communication through the power of the Internet. Immediate, free publication increases the audience for scientific research and overcomes the increasingly high price barrier to access imposed by the traditional, is to shift from a model that uses copyright to control reuse of content to one that uses copyright to encourage republication, preservation, and translation.

Why Support the Open-Access Financial Model?

Pricing of traditional, subscription-financed scientific journals is highly inefficient. The growth in digital technologies and in digital networks should be driving down the price of access to the scholarly journal literature, but instead prices have increased at a rate greatly in excess of inflation (e.g., [4,5]). Moreover, studies from journal publishing in some disciplines show that commercial journal publishers successfully charge significantly more than non-commercial journal publishers, such as scholarly societies, even when the commercial offerings make less valuable contributions to the progress of science and knowledge as measured by citations (e.g., [6]).

The economic roots of the pricing problem are not difficult to discern. Journal publishers provide a platform between authors of journal articles and their readers. In these situations, the go-between can choose a mix of prices to each side of the relationship, usually charging more to the party that is more dependent on the go-between. The traditional demand is relatively inelastic for two reasons. First, libraries are mission-driven to acquire as broad a swath of the literature as they can afford to serve their patrons effectively. Second, subscriptions for academic journals within a given field are not readily interchangeable, unlike, say, subscriptions to news magazines, because each academic journal publishes unique research. Having their subscribers over a barrel, commercial publishers have steadily consolidated to reduce their costs while increasing profits through uncompetitive pricing [7].

The open-access model fundamentally shifts the balance of power in journal publishing, and thereby greatly enhances the efficiency and efficacy of scientific communication. In its most common form, the model shifts the costs of publication entirely to the author-funder side of the relationship so as to broaden access as far as the Internet reaches and to remove the need for any lingering usage barriers. By shifting the costs of publication entirely to the author-funder side, journals must compete head-to-head on quality and price without diminishing impact through price or usage barriers because authors have greater choice over where to publish than libraries have over whether to subscribe. This increased competition will reduce the overall costs

Journal: *College & Research Libraries*

Year: 2012

Volume: 73

Issue:

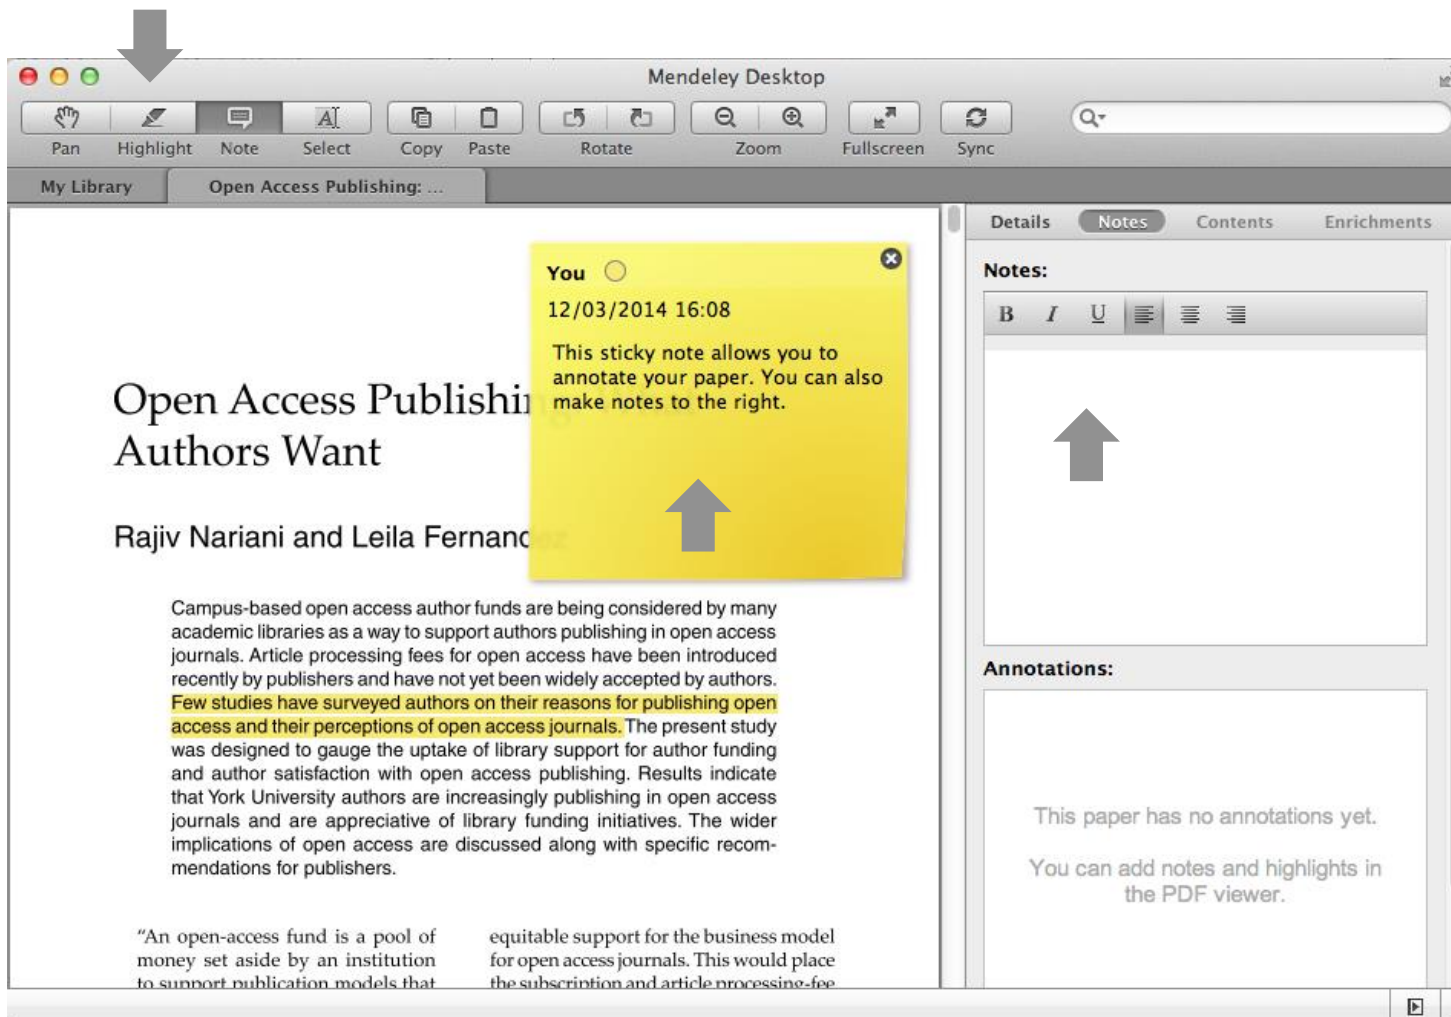

Pages: 182-195

Abstract:

Campus-based open access author funds are being considered by many academic libraries as a way to support authors publishing in open access journals. Article processing fees for open access have been introduced recently by publishers and have not yet been widely accepted by authors. Few studies have surveyed authors on their reasons for publishing open access and their perceptions of open access journals. The present study was designed to gauge the uptake of library support for author funding and author satisfaction with open access publishing. Results indicate that York University authors are increasingly publishing in open access journals and are appreciative of library funding initiatives. The wider implications of open access are discussed along with specific recommendations for publishers.

"An open-access fund is a pool of money set aside by an institution to support publication models that equitable support for the business model for open access journals. This would place the subscription and article processing-fee

Mendeley позволяет решить проблему с оформлением ссылок

The screenshot shows the top section of the Journal of Adolescent Health website. The header is dark blue with the journal title 'JOURNAL OF ADOLESCENT HEALTH' in white. Below the title is the tagline 'Improving the Lives of Adolescents and Young Adults' and the SAHM logo. On the right side of the header, there are social media icons for Twitter, Facebook, and RSS, along with a 'Mobile' button. Below the header is a navigation bar with links for 'Articles & Issues', 'Collections', 'For Parents & Teens', 'For Authors', 'About JAH', and 'SAHM'. Below the navigation bar is a search bar with a dropdown menu set to 'All Content', a 'Search' button, and a link to 'Advanced Search'. On the right side of the search bar, there are social media sharing icons for Facebook, Twitter, and Email, along with a plus sign for more options.

Reference management software

Most Elsevier journals have their reference template available in many of the most popular reference management software products. These include all products that support [Citation Style Language styles](#), such as [Mendeley](#) and [Zotero](#), as well as [EndNote](#). Using the word processor plug-ins from these products, authors only need to select the appropriate journal template when preparing their article, after which citations and bibliographies will be automatically formatted in the journal's style. If no template is yet available for this journal, please follow the format of the sample references and citations as shown in this Guide.

Users of Mendeley Desktop can easily install the reference style for this journal by clicking the following link:

<http://open.mendeley.com/use-citation-style/journal-of-adolescent-health>

When preparing your manuscript, you will then be able to select this style using the Mendeley plug-ins for Microsoft Word or LibreOffice.

^aDivision of Substance Abuse, University Hospitals of Geneva, Switzerland
^bDepartment of Ambulatory Care and Community Medicine, University Hospital, Lausanne, Switzerland
Received 5 June 2007; received in revised form 4 October 2007; accepted 8 October 2007

Abstract

Objective: "Pick-Klop" is a game based on cognitive behavioral therapy. It aims to change smokers' attitudes towards tobacco addiction. This study tests the feasibility and the impact of one brief session of the intervention in a naturalistic setting within a psychiatric hospital.

Method: Fifty-one smokers were recruited during their stay in a psychiatric hospital with a prohibitive smoking policy. They were assessed pre- and post-treatment with visual analogue scales designed to evaluate their intention to stop smoking.

Results: All patients completed the intervention. The outcome shows that the intention to stop smoking becomes significantly stronger after the intervention.

Conclusion: This pilot study supports the feasibility and the effectiveness of the "Pick-Klop" game in a psychiatric hospital setting. The game seems to improve the intention to quit smoking. The data, however, should be confirmed by a controlled trial. Moreover, follow-up studies are needed to examine the potential impact of the game on smoking cessation attempts.

Practical implications: The game seems to be a useful and simple tool for education about smoking in a psychiatric hospital setting.

Keywords: Smoking; Smoking cessation; Cognitive behavior therapy; Motivational interviewing; Psychiatric hospital; Prohibitive smoking policy

1. Introduction

Smoking is the first avoidable cause of morbidity and mortality [1]. Most smoking cessation attempts are made without any help [2].

Despite the efficacy of nicotine substitutes [3], bupropion [4] and some behavioral approaches [5], these treatments are used only by a minority of smokers [6,7]. This is probably due to the insufficient to induce behavioral changes [9]. Positive attitudes towards giving up nicotine addiction, however, are linked to a greater willingness to stop smoking [10].

In the transtheoretical model of behavioral change, a re-evaluation of the advantages and disadvantages of nicotine addiction and cessation enable smokers to evolve within the motivational process [11].

The notion of "self-efficacy" [12] corresponds to the trust

Что такое Mendeley Institutional Edition?

Любой сотрудник/учащийся может зарегистрироваться в Mendeley используя адрес почты Университета, вступить в официальную группу Университета и получить все преимущества институциональной версии:

- возможность организации для каждого пользователя персональной библиотеки объемом до 5Гб с доступом с любого устройства
- возможность создания неограниченного количества открытых и закрытых групп (численностью до 25 человек) для реализации научных проектов.
- размещение ваших статей на официальной странице университета

Social Sciences

North-Eastern Federal University in Yakutsk (NEFU) is one of the ten Russian federal universities. Recent reforms in the Russian Federation have created a new network of federal universities. This trend towards integration and modernization in higher university education is typical of many countries. As international experience shows, additional financial support from government promotes the high quality of education and higher performance in international rankings. <https://s-vfu.ru/>
