

Использование полнотекстовых информационных решений Elsevier в научной работе

Андрей Локтев,
консультант по ключевым информационным решениям Elsevier

14/11/2017

ScienceDirect

- Содержит более **2500** полнотекстовых электронных журналов - 25% издаваемых статей
- В открытом доступе более **380** журналов, в том числе и 14 журналов издательства Cell Press (с 1995 года), рефераты всех статей
- Более **13** млн рефератов/полнотекстовых статей
 - Содержание сформировано с 1995 и далее
 - Ретроспективная коллекция вплоть до Vol. 1 Issue 1
 - Статьи еще не вышедшие в печать
- Электронные энциклопедии (Online Reference works) – 112 названий
- Электронный справочники (Handbooks) – 200 названий
- Электронные книги (e-books) и продолжающиеся издания (Books series) – более **33000** названий + MARC записи

Высококачественные и актуальные данные

- ScienceDirect – это **23,9%** всех опубликованных в мире научных статей*
- **26%** цитирований, в том числе среди самых престижных журналов - 21%*
- Elsevier публикует **28,5%** среди **5%** наиболее цитируемых статей в мире*
- **62** журнала Elsevier занимает первое место в своей научной категории по импакт-фактору

Предметные коллекции ScienceDirect

Highlights

- Eculizumab treatment induces a rapid and sustained decrease of D-dimer levels.
- PNH patients have lower thrombin peak height and thrombin potential.
- No evidence for TF activity or abnormalities in fibrinolysis in PNH patients.
- PNH patients with a history of thrombosis have elevated D-dimer and F1 + 2 levels.

Abstract

Phylogenetically informative characters from the internal anatomy of scorpions were first reported more than 150 years ago, but the subject received little attention after the mid-1920s. Recent investigations, using traditional dissection, illustration and histological sectioning, microscopy, and innovative new methods for investigating complex soft tissue anatomy identified a new wealth of variation. Additionally, these investigations confirmed the phylogenetic significance of previously identified structures. Building on earlier work we present a more detailed description of the hemolymph vascular system

Thrombosis

Eculizumab

Complement C5

ABSTRACT

Background: Paroxysmal Nocturnal Hemoglobinuria is characterized by complement-mediated hemolysis and an increased thrombosis risk. Eculizumab, an antibody to complement factor C5, reduces thrombotic risk via unknown mechanisms. Clinical observations suggest that eculizumab has an immediate effect.

Objectives: A better understanding of the mechanism via which eculizumab reduces thrombotic risk by studying its pharmacodynamic effect on coagulation and fibrinolysis.

Methods: We measured microparticles (MP), tissue factor (TF) activity, prothrombin fragment 1 + 2 (F1 + 2), D-dimer and simultaneously thrombin and plasmin generation in 55 PNH patients. In 20 patients, parameters were compared before and during eculizumab treatment (at 1 and 2 hours, 1, 4 and \geq 12 weeks after commencement).

Results: Patients with a history of thrombosis had elevated D-dimers ($p = 0.02$) but not MP. Among patients on anticoagulants, those with thrombosis had higher F1 + 2 concentrations ($n = 0.003$). TF activity was undetectable in

definition presented in section 2.

4.1.4. Types of outcome measures

This systematic review covers studies on both speech-language deficits and hearing-impaired cases; therefore, in quantitative studies, both speech production and speech comprehension measures are taken into account, such as the Goldman-Fristoe Test of Articulation (GFTA) (Goldman and Fristoe, 2000), percentage of constants correct (PCC) (Shriberg et al., 1997), correctness of pronunciation, task completion performance, word discrimination test (WDT) phonological assessment battery (PhAB) (Frederickson et al., 1997), phonological awareness (Gillon, 2004), hearing in noise test, sound pressure level, word recognition accuracy (WRA), BKB sentence test (Bench et al., 1979), average sentence level word accuracy, word naming score (WNS), and the word verification rate (WVR). In qualitative studies, the outcome measures are the interviews and/or questionnaires which were designed to address the research questions.

4.2. Information sources

The studies were identified by searching electronic databases, scanning reference lists of articles and engaging in consultation with experts in the field of information technology and speech therapy. No limits were applied to the languages the proposed VSTs were designed for. This search was applied to Medline, PubMed,² ProQuest Central,³ Web of Science,⁴ Allied and Contemporary Medicine (AMED),⁵ Informa Healthcare,⁶ Wiley Digital Library,⁷ Taylor & Francis,⁸ Springer,⁹ ScienceDirect,¹⁰ IEEEExplore,¹¹ and ACM Digital Library¹² electronic databases. The SpeechBite¹³ database was also searched. Finally, we tried GoogleScholar¹⁴ as an integrated and comprehensive academic search

**The Bkb (Bamford–Kowal–Bench)
sentence lists for partially-hearing children**
Br. J. Audiol., 13 (1979), pp. 108–112

Abstract

Linguistic guidelines for the design of sentences for speech audiometry with children are described, and new lists of test sentences which are based on such guidelines—the Bamford-Kowal-Bench sentence Lists for Children—are introduced. Audiometric data relating to the use of the new lists are presented and discussed. © 1979, Informa UK Ltd. All rights reserved.

5.5. Intervention

Various samples of VSTs were introduced and adopted in the selected studies. All the studies introduced their own developed tools and used them for intervention except one study, in which previously developed software was used (Wild, 2009). Interventions varied based on the technical abilities of the VST used, the disorder targeted, and the intervention framework the SLPs had selected. Fig. 7 [redacted] the intervention categories for which VSTs were developed. Nine publications focused on articulation (Chaisanit et al., 2010, Engwall et al., 2006, Eriksson et al., 2005, Fagel and Madany, 2008, George and Gnanayutham, 2010, Hawley et al., 2013, Massaro and Light, 2004, Schipor et al., 2010 and van Vuuren and Cherney, 2014) and eight publications considered phonological awareness intervention (Abad et al., 2013, Moore et al., 2005, Segers and Verhoeven, 2004, Silva et al., 2012, Stacey et al., 2010, Thompson et al., 2010, Wild, 2009 and Wren and Roulstone, 2008). One study dealt with the acoustic features of pitch, vocal loudness, and duration, which was categorized in phonation class (Cole et al., 2007). Two studies had the features to deal with all three categories of articulation, phonological awareness, and phonation, which were classified in the general class in the diagram (Danubianu et al., 2009 and Saz et al., 2009).
